movie_box_office_kr_until_2025

I adjusted the column widths so the headers were fully visible. In column Q, I used the PROPER function to capitalize the header names, then copied the formula across all header columns. Next, I copied the capitalized headers, selected the original headers in A1:O1, right-clicked, chose Paste Special > Values Only, and cleared the data in column Q. I also changed the sales format from General to the Korean won currency symbol.

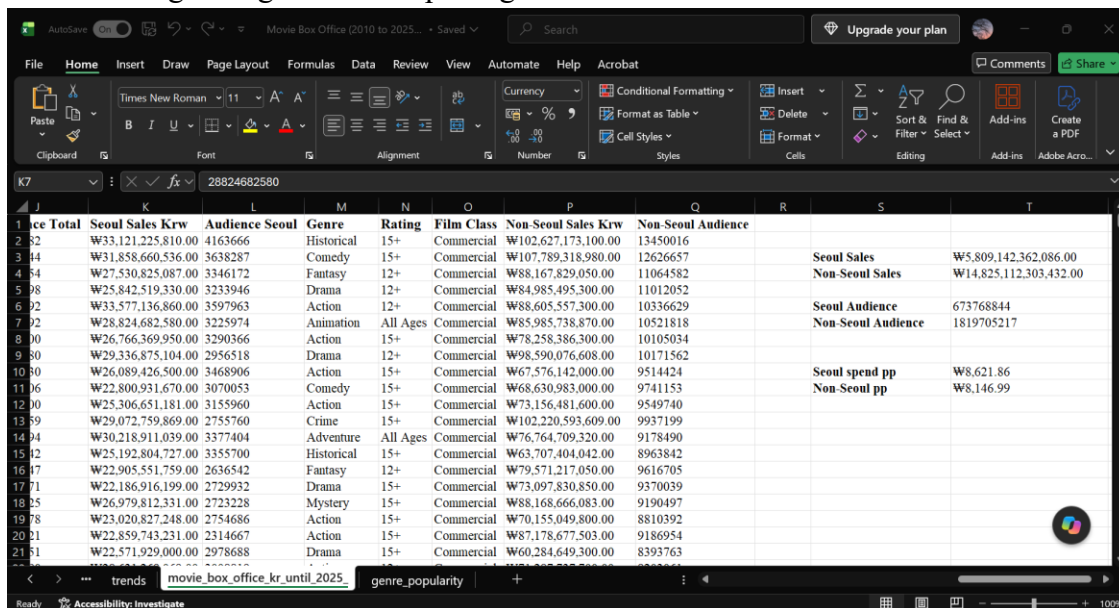

Q1: Track and visualize genre Popularity over time.

I used a pivot table to show the genre and the total number of times a movie appeared in that category, then plotted it as a line graph with markers.

Q2: Compare audience turnout vs. revenue by region

Comparing Seoul to the rest of Korea, audiences nationwide spent a combined ₩14.8 trillion outside Seoul versus ₩5.8 trillion within Seoul, which is unsurprising, given that Seoul is one city while the rest of the country is not. However, on a per-person basis, Seoul audiences spent an average of ₩8,622 per ticket, about 5.8% more than the ₩8,147 average in the rest of Korea. This suggests Seoul moviegoers pay a modest premium, likely reflecting more premium-format screens or higher regional ticket pricing.

Q3: Analyze age ratings and their box office impact

Age rating has minimal impact on individual spending: audiences spend a fairly consistent ₩8,072–₩8,509 per person regardless of rating, a spread of only about 5%. However, ratings differ dramatically in their share of total box office: 15+ films dominate with 40.3% of all revenue, followed by 12+ at 37.3%, while All Ages films contribute 13.5% and 18+ films only 8.9%. This suggests the revenue gap between ratings comes from audience reach and film volume, not from viewers spending more or less per ticket based on a film's rating.

Row Labels	Sum of Total Sales Krw	Sum of Audience Total	Revenue Per Audience	% of Total Revenue
12+	₩7,696,997,604,406.00	904610105	₩8,508.64	37%
15+	₩8,322,217,112,856.00	1027033695	₩8,103.16	40%
18+	₩1,828,205,603,645.00	226476730	₩8,072.38	9%

Unknown	₩6,000.00	1	₩6,000.00	0%
Grand Total	₩20,634,254,665,518.00	249347406.1	₩8,275.30	

Q4: Discover how Korean movie trends evolved from *Myeongryang* to *Parasite*

Between *Myeongryang* (2014) and *Parasite* (2019), Korean cinema grew steadily; audiences, screens, and film output all expanded, peaking in 2019 with 226M admissions across 1,943 films. The pandemic then triggered a severe contraction, with audiences dropping 77% in 2020. Recovery has been slow and incomplete: by 2024, audiences remained at roughly half of pre-pandemic levels, and the industry is releasing notably fewer films than its 2019 peak, suggesting a structurally smaller market even years after the initial shock.

Row Labels	Count of Title	Sum of Audience Total	Sum of Total Screens
